SERGEY EREMEEV
FRONTEND DEVELOPER

Sokolova-Sokolenka str, 8/78, Vladimir, 600018, Russia
T: +7 (904) 859 87 42 | E: 13.eremeev.sv@gmail.com

Personal Statement

Many developers can display years of experience behind their backs, a decent portfolio and a knowledge about various technologies. However, most developers lack one thing - discipline. There is nothing more important than being able to sit down and work when you do not feel like it, to get inspired when you feel sick, to think critically when you are tired, to keep learning when you want to rest. Discipline turns a talented person into the exceptional one. The lack of it just makes him average. The only way to achieve success is constant self-improvement and the only valid point of reference is you the day earlier.

Having a person in a team who truly values discipline is the best way to achieve greater results and help others transform their approach to daily tasks. You shall never worry about deadlines, missed opportunities, weak work standards and other potentially harming factors because they simply do not exist in the life of a truly disciplined individual. I am not scared of being put out of my comfort zone, I enjoy tight deadlines because I see challenge in them, I love harder problems because they give meaning to my work, and I want more responsibilities because I can not wait to make an impact. I believe in the things I say. I am not afraid of promising big, because I know that I can and I will deliver even bigger.

Work Experience

The Recon Group Inc

Front-end developer   *August 2014 – Present*

Working in a fast-paced environment within a medium-sized team of developers on various large-scale e-commerce projects.

Duties
